

Skill Sprout™

SIBLING SUPPORT GROUP

for children who have a sibling with special needs

This weekly support group is specially designed for siblings of children with special needs (e.g., Autism, ADHD, Down Syndrome, etc.) We realize that this type of sibling relationship can be unique and complex. During this weekly support group, we will teach your child basic skills and strategies to improve the quality of relationship with his or her sibling. The planned activities will also help children express their feelings in a safe comfortable atmosphere, share common joys and struggles of having a sibling with special needs and build friendships with other siblings. This group will be run by trained mental health staff.
